A cult band who almost slipped into oblivion return with a magnificent new album. **PERFIDIOUS WORDS** present what is only their third studio album in ten years, but some things need time in order to become fully realised.

'**Feel Like Me**' is not only fully realised: it's perfect! An accomplished electro pop album which will satisfy the longing of many fans. Whereas some bands have spent years indulging in wild experiments or creating generic chart-friendly mush, **PERFIDIOUS WORDS** create music which is a perfect mixture of the danceable, sensitive and catchy, without spilling over into the realms of triviality. Warm, dark vocals combine with insanely catchy synth sounds to form a fervent album of electronic music. Full of spirit, full of sounds; exactly that which every electro pop fan has waited in vain for years for. Here it is! The ultimate work, which shows that after over 20 years, this genre is a long way from coming to an end. Those who liked the early works of YAZOO or ERASURE shouldn't pass this electro pop-pearl by.

These aren't the 'sounds of the universe', simply single stars in the dark sky of electronic music, which shine all the brighter for it!

In addition to the CD, the album comes with an 80-minute DVD, which proves beyond doubt that **PERFIDIOUS WORDS** are exceptional musicians who understand their craft. With this concert recording, some studio sessions and a video clip, people will be asking themselves in astonishment where this band was during those last few years in which we mourned the old gods, who with their most recent releases only disappointed.
